

Fig. 1 is a perspective view of a vehicle window assembly. The assembly includes a window frame (10) and a window pane (12). A power window motor (26) is mounted to the frame. The motor is connected to a linkage mechanism (18) that includes two vertical link arms (20) and two curved link arms (28). The link arms are connected to the window pane (12) via mounting brackets (22) and pivot points (16a). The entire assembly is housed within a window well (14).
